

METABOLIC EFFECTS

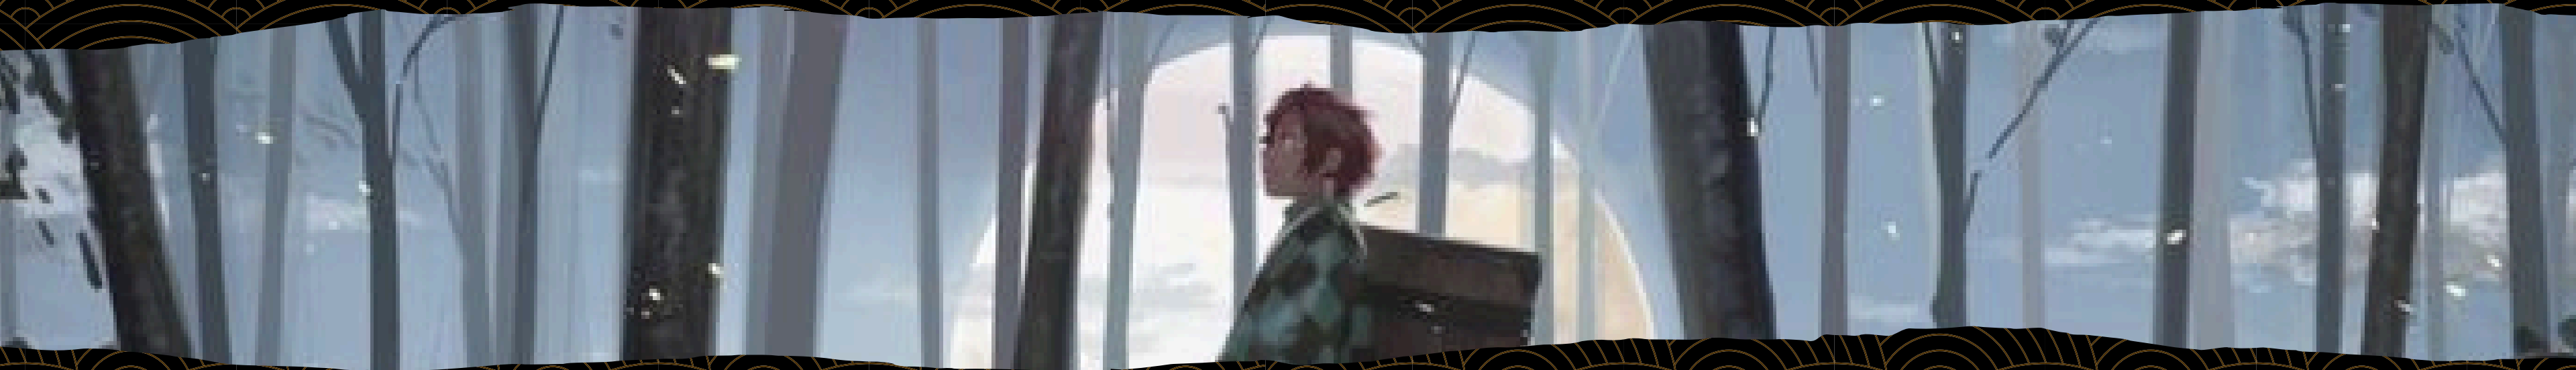

INSULIN

GLUCAGON

AYAT SHOAITB-MS2

TABLE OF CONTENTS

**ROLE OF INSULIN & GLUCAGON
IN ENERGY METABOLISM**

**ANABOLIC EFFECTS OF INSULIN VS
CATABOLIC EFFECTES OF GLUCAGON**

**MOLECULAR MECHANISMS OF
INSULIN & GLUCAGON**

**ROLE OF COUNTERREGULATPRY
HORMONES**

Before you start

Gluconeogenesis: Making of new glucose from nutrients

Glycogenolysis: Breaking of glycogen stores to increase plasma glucose

Insulin ---> Anabolism & Storage

Glucagon & Epinephrine ---> Catabolism

(Incase I say something different in the recording, these are the right terms.

Apologies PRO has fried my dopamine receptors)

THANK YOU!!
